

# Take Off Request Form

These systems are modular making them easily customizable for Residential or Commercial build projects. Please complete this form and email it to us with a Sketch, PDF or Project Plans. Be sure to include detailed measurements. Pictures of the existing area are very helpful to us.

Sketch your project to scale. Start from the left and measure from each end to the next end or corner (Figure 1). Please note the type of surface the railing system will be mounted on and if Surface or Fascia posts are desired. If posts are not being supplied, please indicate the position of each post (Figure 2). Railing sections are offered in standard heights of 36" or 42". Refer to your local building code and note the required rail height for your project.

Please send your project to [info@Railing-Pro.com](mailto:info@Railing-Pro.com)

Most projects are quoted with 2 days, however more involved projects may longer to quote.
